Tissue&Cell

# Subject index

## A

A-cells of chicken endocrine pancreas, immunocytochemical colocalisations of serotonin/aromatic L-amino acid decarboxylase/polypeptide hormones in, 439
*Acanthopagrus schlegelli* spermatozoa, ultrastructural study of osmolality effect on, 491
Adenohypophysis of mink (*Mustela vison*), presence of mammosomatotropic cells, 79
Adipose tissue in pre-term human new-borns, brown, ultrastructural study, 339
Adrenal cortex of rat with renal hypertension, *c-fos* expression in, 499
*Aedes aegypti*, pore channel system in grooved pegs of antennae, 47
African clawed toad (*Xenopus laevis*) embryos, analysis of tissue organisation by microinjection of follistatin into early, 331
Alpha-fetoprotein localisation in developing chick amniotic membrane, 85
Aluminium localisation in digestive gland of terrestrial snail (*Helix aspersa*), 61
Amniotic membrane, alpha-fetoprotein localisation in developing chick, 85
Amphipods, gammarid, microtubule systems associated with septate junctions of gill cells of four, 3
Anatomical research, quantitative morphology as a necessary component of modern, 1
Angiogenesis in chick chorioallantoic membrane, differentiation of microvascular endothelium during early, 159
Annelids, new aspects of possible sites of ultrafiltration in, 73
Antenna
  *Aedes aegypti*, pore channel system in grooved pegs, 47
  *Antheraea polyphemus* (silkmoth)
    experimental disturbance of antennal branch formation, 289
    peripheral nervous system development, 275
Antennal lobe projection patterns of olfactory receptor neurons involved in sex pheromone detection in *Spodoptera littoralis* (Lepidoptera:Noctuidae), 221
*Antheraea polyphemus* antenna, *see* Antenna
Antigen expression, peritoneal macrophage subpopulations in mouse fractionated on percoll gradients showing differences in, suggestive of different stages of maturation, 505
Aorta, human
  intima, gap junctional communication in primary culture of human cells derived from, 591
  smooth muscle cell heterogeneity in embryonic, 31
Arawana (*Osteoglossum bicirrhosum* – an ancient teleost), corpuscles of Stannius in, 425
L-Aromatic amino acid decarboxylase, immunocytochemical colocalisations of serotonin/polypeptide hormones and, in A- and PP-cells of chicken endocrine pancreas, 439
Articular chondrocytes, adaptive cellular response to osmotic stress in pig, 173
Atlantic croaker spermatozoa, ultrastructural study of osmolality effect on, 491
Atlantic shore crab (*Carcinus maenas*) sclerite epicuticle, fine structure and morphogenesis of, 525
Atrial natriuretic factor, guanylate cyclase response in epithelial cells of frog choroid plexus to, 233

## B

Barklouse (*Lepin patruelis*), sclerotised spermatophore of, 447
Black grouper spermatozoa, ultrastructural study of osmolality effect on, 491
Black porgy spermatozoa, ultrastructural study of osmolality effect on, 491
Blood supply, *see* Vasculature
Bone resorption by normal osteoclasts in response to 1,25-dihydroxyvitamin D, osteoblasts from toothless (osteopetrotic) mutation in rats unable to direct, 569
Brown adipose tissue in pre-term human new-borns, ultrastructural study, 339

## C

*Caenorhabditis elegans* cuticle, freeze-fracture and deep-etched view of, 561
Calcite in ophiuroid vertebral ossicles, skeletal, microstructural roughness as evidence of wear, 539
*Callithrix jacchus* (marmoset), assessment of tissue integrity/ultrastructure/steroidogenic activity of corpora lutea of, following in vitro microdialysis, 467
Calmodulin in *Helix aspersa* cerebral neurons during hibernation, changes in cytochemical detection of, 185
*Carcinus maenas*, fine structure and morphogenesis of sclerite epicuticle, 525
Cartilage of *Octopus vulgaris*, comparative microscopic and ultrastructural study of periochondrial tissue in, 515
Cementum-related predentin of young mouse incisors, proteoglycans in, as visualised by cuprolinic blue, 55
Cephalopod
  *Octopus vulgaris*, comparative microscopic and ultrastructural study of periochondrial tissue in cartilage of, 515
  *Sepia officinalis*, immunoelectron-microscopic study of G-protein distribution in photoreceptor cells, 317
Cerebral neurons of *Helix aspersa* during hibernation, changes in cytochemical detection of calmodulin/cytoskeletal components/phosphatases, 185
Cervical tumour cell lines, immunohistochemical analysis of proliferation and differentiation in organotypic cultures of, 269
*C-fos* expression in adrenal cortex of rat with renal hypertension, 499
Chick
  amniotic membrane, alpha-fetoprotein localisation in developing, 85
  chorioallantoic membrane, differentiation of microvascular endothelium during early angiogenesis and respiratory onset in, 159
Chicken endocrine pancreas, immunocytochemical colocalisations of serotonin/aromatic L-amino acid decarboxylase/polypeptide hormones in A- and PP-cells of, 439
Cholesterol transport from lipid droplets to mitochondria, peroxisomes and sterol carrier protein-2 involved in, during luteal cell steroidogenesis, 483
Chondrocytes, pig articular, adaptive cellular response to osmotic stress in, 173
Chorioallantoic membrane, differentiation of microvascular endothelium during early angiogenesis and respiratory onset in chick, 159
Choroid plexus, guanylate cyclase response to atrial natriuretic factor in epithelial cells of frog, 233
Condyles, mandibular, establishment and characterisation of two clonal cell lines derived from mouse, 369
Connective compartment of mouse thymic reticulum, 249
Cord, spinal, type II cytokeratin expression of adult vertebrates, 555
Corneal endothelium of rabbit, correcting cell density measurements for tissue hydration changes in scanning EM applied to, 207
Corpora lutea of marmoset monkey (*Callithrix jacchus*), assessment of tissue integrity/ultrastructure/steroidogenic activity of, following in vitro microdialysis, 467
Corpuscles of Stannius in arawana (*Osteoglossum bicirrhosum* – an ancient teleost), 425
Crab, Atlantic shore (*Carcinus maenas*), fine structure and morphogenesis of sclerite epicuticle, 525

Crayfish (*Orconectes limosus*) microvillar cytoskeleton of photoreceptor, ultrastructural changes related to different adaptation conditions, 405
Cuprolinic blue, proteoglycans in cementum- and enamel-related predentin of young mouse incisors as visualised by, 55
Cuticle of *Caenorhabditis elegans*, freeze-fracture and deep-etched view of, 561
Cystatin S in secretory granules fractions isolated from submandibular gland of infected rats by *Trypanosoma cruzi*, 167
Cystic duct epithelium of female Syrian hamster, ultrastructural changes as result of sex steroid treatment, 149
Cytokeratin type II expression in adult vertebrate spinal cord, 555
Cytokines in thymus of anuran amphibian (*Rana esculenta*), presence of immunoreactive pro-opiomelanocortin-derived, 263
Cytoskeleton
in cerebral neurons of *Helix aspersa* during hibernation, changes in cytochemical detection of components of, 185
in photoreceptor of crayfish (*Orconectes limosus*), microvillar, ultrastructural changes related to different adaptation conditions, 405

D

Dermapteran (*Labidura riparia*), vitellogenesis inhibited by 20-hydroxyecdysone in, 575
Digestive gland of terrestrial snail *Helix aspersa*, aluminium localisation in, 61
1,25-Dihydroxyvitamin D, osteoblasts from toothless (osteopetrotic) mutation in rat are unable to direct bone resorption by normal osteoclasts in response to, 569
Dorsal papillae in holothurioid *Holothuria forskali* (Echinodermata), fine structure, 457
*Drosophila* embryo lectin histochemistry, 23
Dynein arms, flagellar structure in spermatozoa lacking, 241

E

Echinoderm *Holothuria forskali*, fine structure of dorsal papillae, 457
Electron microscopy
immuno-, in study of G-protein distribution in photoreceptor cells of cephalopod *Sepia officinalis*, 317
scanning, tissue hydration changes in, correcting cell density measurements for, applied to rabbit corneal endothelium, 207
Enamel-related predentin of young mouse incisors, proteoglycans in, as visualised by cuprolinic blue, 55
Endocrine pancreas, immunocytochemical colocalisations of serotonin/aromatic L-amino acid decarboxylase/polypeptide hormones in A- and PP-cells of chicken, 439
Endometrial expression of glycoconjugates and lectins in mouse, histochemical demonstration of oestrous cycle-related alterations in, 197
Endothelium
chick chorioallantoic membrane microvascular, differentiation during early angiogenesis and respiratory onset in, 159
rabbit corneal, correcting cell density measurements for tissue hydration changes in scanning EM applied to, 207
Epicuticle in Atlantic shore crab (*Carcinus maenas*), sclerite, fine structure and morphogenesis of, 525
*Epinephelus malabaricus* spermatozoa, ultrastructural study of osmolality effect on, 491
Epithelial cells of frog choroid plexus, guanylate cyclase response to atrial natriuretic factor, 233
Epithelium
cystic duct, ultrastructural changes as result of sex steroid treatment in female Syrian hamster, 149
stratified squamous, mucin-like glycoproteins of, 397
Erythrocytes, recognition of 170 kD protein in mammalian Golgi complexes by antibody to lamellae of malaria-infected, 355

F

Fetoprotein localisation in developing chick amniotic membrane, 85
Fibrous tissues of thymic reticulum of mice, 249
Filaments, thick, myofibrillogenesis in rodent skeletal muscle involving aggregates of, 91
Flagellum, spermatozoa, *see* Spermatozoa
Follistatin, analysis of tissue organisation by microinjection into *Xenopus laevis* early embryos, 331
*c-Fos* expression in adrenal cortex of rat with renal hypertension, 499
Frog, *see Rana* spp.

G

G-protein distribution in photoreceptor cells of cephalopod *Sepia officinalis*, immunoelectron-microscopic study of, 317
Gammarid amphipods, microtubule systems associated with septate junctions of gill cells of four, 3
Gap junctions
in human aortic intima-derived primary cell cultures, 591
insect, improved enrichment by filtration and sonication of NaOH-extracted subcellular fractions, 349
tunicate, two different forms (one with cytoskeletal attachments) within same organism, 545
Gastric tissue, *see* Stomach
Gill cells of four gammarid amphipods, microtubule systems associated with septate junctions of, 3
Glutamylated tubulin in flagellum of mouse spermatozoa, differential distribution of, 323
Glycoconjugates, oestrous cycle-related alterations in mouse endometrial expression of, histochemical demonstration, 197
Glycoproteins, mucin-like, of stratified squamous epithelia, 397
Glycosomes in trypanosomatids of *Phytomonas* spp., 3-D reconstruction of, 39
Golgi complexes, antibody to malarial intraerythrocytic lamellae recognising 170 kD protein in mammalian, 355
Grooved pegs in antennae of *Aedes aegypti*, pore channel system in, 47
Guanine nucleotide-binding (G) protein distribution in photoreceptor cells of cephalopod *Sepia officinalis*, immunoelectron-microscopic study of, 317
Guanylate cyclase response to atrial natriuretic factor in epithelial cells of frog choroid plexus, 233

H

Hamster, female Syrian, ultrastructural changes of cystic duct epithelium in, as result of sex steroid treatment, 149
Harvestman (*Leiobunum rotundum*), immunocytochemical localisation of lysozyme in nephrocytes of, 299
*Helix aspersa*
cerebral neurons during hibernation, changes in cytochemical detection of calmodulin/cytoskeletal components/phosphatases, 185
digestive gland of, aluminium localisation in, 61
Hibernation, cerebral neurons of *Helix aspersa* during, changes in cytochemical detection of calmodulin/cytoskeletal components/phosphatases, 185
*Holothuria forskali* (Echinodermata), fine structure of dorsal papillae, 457
Hydration changes in scanning EM, tissue, correcting cell density measurements for, applied to rabbit corneal endothelium, 207
20-Hydroxyecdysone, vitellogenesis in Dermapteran (*Labidura riparia*) inhibited by, 575
5-Hydroxytryptamine (serotonin), immunocytochemical colocalisations of aromatic L-amino acid decarboxylase/polypeptide hormones and, in A- and PP-cells of chicken endocrine pancreas, 439
Hypertension, renal, *c-fos* expression in adrenal cortex of rat with, 499

I

Immunoelectron-microscopic study of G-protein distribution in photoreceptor cells of cephalopod *Sepia officinalis*, 317
Incisors, proteoglycans in cementum- and enamel-related predentin of young mouse, as visualised by cuprolinic blue, 55
Infants, brown adipose tissue in human pre-term new-born, ultrastructural study, 339
Innervation
antenna of *Antheraea polyphemus*, 275

stomach of rodent embryo, structural study of appearance, 309
thymus reticulum of mice, 249
Insulin binding in *Tetrahymena pyriformis*, effect of long-term insulin exposure on, 585
Interstitial cells of trout testis (*Oncorhychus mykiss*), ultrastructural characterisation and changes throughout reproductive cycle, 383
Intima, aortic, gap junctional communication in primary culture of human cells derived from, 591

K

Kidney, *see entries under* Renal

L

*Labidura riparia*, vitellogenesis inhibited by 20-hydroxyecdysone in, 575
Lectins
*Drosophila* embryo histochemistry, 23
mouse
oestrous cycle-related alterations in endometrial expression of, histochemical demonstration, 197
peritoneal macrophage subpopulations fractionated on percoll gradients showing differences in binding of, suggestive of different stages of maturation, 505
*Leiobunum rotundum*, immunocytochemical localisation of lysozyme in nephrocytes of, 299
Lepidoptera (*Spodoptera littoralis*), antennal lobe projection patterns of olfactory receptor neurons involved in sex pheromone detection in, 221
*Lepin patruelis* (barklouse), sclerotised spermatophore of, 447
Lipid droplets, luteal cell, peroxisomes and sterol carrier protein-2 involved in cholesterol transport to mitochondria from, during steroidogenesis, 483
Luteal cell steroidogenesis, peroxisomes and sterol carrier protein-2 involved in cholesterol transport from lipid droplets to mitochondria during, 483
Lymphoid tissue in musk shrew kidney (*Suncus murinus*), 421
Lysozyme in nephrocytes of harvestman (*Leiobunum rotundum*), immunocytochemical localisation of, 299

M

Macrophages, peritoneal mouse, subpopulations fractionated on percoll gradients showing differences in cell size/lectin binding/antigen expression suggestive of different stages of maturation, 505
Malarial intra-erythrocytic lamellae, recognition of 170 kD protein in mammalian Golgi complexes by antibody to, 355
Mammosomatotropic cells in mink (*Mustela vison*) adenohypophysis, presence, 79
Mandibular condyles, establishment and characterisation of two clonal cell lines derived from mouse, 369
Marmoset monkey (*Callithrix jacchus*), assessment of tissue integrity/ultrastructure/steroidogenic activity of corpora lutea of, following in vitro microdialysis, 467
*Micropogonias undulatus* spermatozoa, ultrastructural study of osmolality effect on, 491
Microtubule systems associated with septate junctions of gill cells of four gammarid amphipods, 3
Microvascular endothelium during early angiogenesis and respiratory onset in chick chorioallantoic membrane, differentiation of, 159
Microvillar cytoskeleton in photoreceptor of crayfish (*Orconectes limosus*), ultrastructural changes related to different adaptation conditions, 405
Mink (*Mustela vison*) adenohypophysis, presence of mammosomatotropic cells, 79
Mitochondria, peroxisomes and sterol carrier protein-2 involved in cholesterol transport from lipid droplets to, during luteal cell steroidogenesis, 483
Monkey, marmoset (*Callithrix jacchus*), assessment of tissue integrity/ultrastructure/steroidogenic activity of corpora lutea of, following in vitro microdialysis, 467
Morphology, quantitative, as a necessary component of modern anatomical research, 1
Mosquito *Aedes aegypti*, pore channel system in groved pegs of antennae, 47
Mouse
incisors, proteoglycans in cementum- and enamel-related predentin of young, as visualised by cuprolinic blue, 55
mandibular condyles, establishment and characterisation of two clonal cell lines derived from, 369
oestrous cycle-related alterations in endometrial expression of glycoconjugates and lectins in, histochemical demonstration, 197
peritoneal macrophage subpopulations fractionated on percoll gradients showing differences in cell size/lectin binding/antigen expression suggestive of different stages of maturation, 505
skeletal muscle of, myofibrillogenesis involving thick filament aggregates, 91
spermatozoa flagellum, differential distribution of glutamylated tubulin in, 323
stomach innervation in embryos of, structural study of appearance, 309
thymic reticulum, connective compartment of, 249
Mucin-like glycoproteins of stratified squamous epithelia, 397
Muscle
skeletal, myofibrillogenesis involving thick filament aggregates in rodents, 91
smooth, aortic human embryonic cells from, heterogeneity, 31
Musk shrew (*Suncus murinus*), renal lymphoid tissue, 421
*Mustela vison* adenohypophysis, presence of mammosomatotropic cells, 79
Myofibrillogenesis in rodent skeletal muscle in vitro: two pathways involving thick filament aggregates, 91
Myoid cells in thymic reticulum of mice, 249

N

Neonates, brown adipose tissue in human pre-term, ultrastructural study, 339
Nephrocytes of harvestman (*Leiobunum rotundum*), immunocytochemical localisation of lysozyme in, 299
Nerve supply, *see* Innervation
New-borns, brown adipose tissue in human pre-term, ultrastructural study, 339
Noctuidae (*Spodoptera littoralis*), antennal lobe projection patterns of olfactory receptor neurons involved in sex pheromone detection in, 221

O

*Octopus vulgaris*, comparative microscopic and ultrastructural study of periochondrial tissue in cartilage of, 515
Oestrous cycle-related alterations in expression of glycoconjugates and lectins in mouse endometrium shown histochemically, 197
Olfactory receptor neurons, antennal lobe projection patterns of, involved in sex pheromone detection in *Spodoptera littoralis* (Lepidoptera:Noctuidae), 221
Oligochaeta, new aspects of possible sites of ultrafiltration in, 73
Oncogene (*c-fos*) expression in adrenal cortex of rat with renal hypertension, 499
*Oncorhychus mykiss* (trout) interstitial cells of testis, ultrastructural characterisation and changes throughout reproductive cycle, 383
Ophiuroid vertebral ossicles, skeletal calcite in, microstructural roughness as evidence of wear, 539
*Orconectes limosus* microvillar cytoskeleton of photoreceptor, ultrastructural changes related to different adaptation conditions, 405
Osmolality effect on spermatozoa of three marine teleosts, ultrastructural study of, 491
Osmotic stress in pig articular chondrocytes, adaptive cellular response to, 173
Ossicles, skeletal calcite in ophiuroid vertebral, microstructural roughness as evidence of wear, 539
Osteoblasts from toothless (osteopetrotic) mutation in rat are unable to direct bone resorption by normal osteoclasts in response to 1,25-dihydroxyvitamin D, 569

Osteoclasts, osteoblasts from toothless (osteopetrotic) mutation in rat are unable to direct bone resorption by normal, in response to 1,25-dihydroxyvitamin D, 569
*Osteoglossum bicirrhosum* (an ancient teleost), corpuscles of Stannius in, 425
Osteopetrotic mutation in rat, osteoblasts from, unable to direct bone resorption by normal osteoclasts in response to 1,25-dihydroxyvitamin D, 569

## P

Pancreas, endocrine, immunocytochemical colocalisations of serotonin/aromatic L-amino acid decarboxylase/polypeptide hormones in A- and PP-cells of chicken, 439
Papillae, dorsal, in holothurioid *Holothuria forskali* (Echinodermata), fine structure, 457
Peptides, pro-opiomelanocortin-derived, in thymus of anuran amphibian (*Rana esculenta*), presence of immunoreactive, 263, *see also* Polypeptide hormones *and specific peptides*
Peripheral nervous system development, *Antheraea polyphemus* antenna, 275
Peritoneal macrophage subpopulations of mouse fractionated on percoll gradients showing differences in cell size/lectin binding/antigen expression suggestive of different stages of maturation, 505
Peroxisomes involved in cholesterol transport from lipid droplets to mitochondria during luteal cell steroidogenesis, 483
Pheromone detection in *Spodoptera littoralis* (Lepidoptera: Noctuidae), antennal lobe projection patterns of olfactory receptor neurons involved in, 221
Phosphatases in cerebral neurons of *Helix aspersa* during hibernation, changes in cytochemical detection of, 185
Photoreceptors
  cephalopod (*Sepia officinalis*), immunoelectron-microscopic study of G-protein distribution in, 317
  crayfish (*Orconectes limosus*), ultrastructural changes related to different adaptation conditions of microvillar cytoskeleton in, 405
*Phytomonas* spp., 3-D reconstruction of glycosomes in trypanosomatids of, 39
Pig articular chondrocytes, adaptive cellular response to osmotic stress in, 173
Pituitary of mink (*Mustela vison*), anterior, presence of mammosomatotropic cells, 79
*Plasmodium falciparum*-infected erythrocytes, recognition of 170 kD protein in mammalian Golgi complexes by antibody to lamellae of, 355
Polypeptide hormones, immunocytochemical colocalisations of serotonin/L-aromatic amino acid decarboxylase and, in A- and PP-cells of chicken endocrine pancreas, 439
Pore channel system in grooved pegs in antennae of *Aedes aegypti*, 47
PP-cells of chicken endocrine pancreas, immunocytochemical colocalisations of serotonin/aromatic L-amino acid decarboxylase/polypeptide hormones in, 439
Predentin of young mouse incisors, proteoglycans in cementum- and enamel-related, as visualised by cuprolinic blue, 55
Pre-term human new-borns, brown adipose tissue in, ultrastructural study, 339
Pro-opiomelanocortin-derived peptides and cytokines in thymus of anuran amphibian (*Rana esculenta*), presence of immunoreactive, 263
Proteoglycans in cementum- and enamel-related predentin of young mouse incisors as visualised by cuprolinic blue, 55

## Q

Quantitative morphology: a necessary component of modern anatomical research, 1

## R

Rabbit corneal endothelium, correcting cell density measurements for tissue hydration changes in scanning EM applied to, 207
Rainbow trout interstitial cells of testis, ultrastructural characterisation and changes throughout reproductive cycle, 383
*Rana* spp.
  *esculenta* guanylate cyclase response to atrial natriuretic factor in epithelial cells of choroid plexus, 233
  pro-opiomelanocortin-derived peptides and cytokines in, presence of immunoreactive, 263
  *temporaria*, metamorphic changes in stomach of tadpoles, 13
Rats
  adrenal cortex of renal hypertensive, *c-fos* expression in, 499
  osteoblasts from toothless (osteopetrotic) mutation in, unable to direct bone resorption by normal osteoclasts in response to 1,25-dihydroxyvitamin D, 569
  skeletal muscle of, myofibrillogenesis involving thick filament aggregates, 91
  stomach innervation in embryos of, structural study of appearance, 309
  submandibular gland fractions of *Trypanosoma cruzi* infected, cystatin S in secretory granules fractions isolated, 167
Red blood cells, recognition of 170 kD protein in mammalian Golgi complexes by antibody to lamellae of malaria-infected, 355
Renal hypertension, *c-fos* expression in adrenal cortex of rat with, 499
Renal lymphoid tissue in musk shrew (*Suncus murinus*), 421
Reproductive cycle of rainbow trout, ultrastructural characterisation and changes of interstitial cells of testis, 383
Respiratory onset in chick chorioallantoic membrane, differentiation of microvascular endothelium during, 159
Rodent, *see individual species*

## S

Scanning EM, tissue hydration changes in, correcting cell density measurements for, applied to rabbit corneal endothelium, 207
Sclerite epicuticle in Atlantic shore crab (*Carcinus maenas*), fine structure and morphogenesis of, 525
Sclerotised spermatophore of barklouse (*Lepin patruelis*), 447
*Sepia officinalis*, immunoelectron-microscopic study of G-protein distribution in photoreceptor cells, 317
Septate junctions of gill cells of four gammarid amphipods, microtubule systems associated with, 3
Serotonin, immunocytochemical colocalisations of aromatic L-amino acid decarboxylase/polypeptide hormones and, in A- and PP-cells of chicken endocrine pancreas, 439
Sex pheromone detection in *Spodoptera littoralis* (Lepidoptera: Noctuidae), antennal lobe projection patterns of olfactory receptor neurons involved in, 221
Sex steroids, *see* Steroid; Steroidogenesis; Steroidogenic activity
Silkmoth antenna, *see* Antenna
Skeletal calcite in ophiuroid vertebral ossicles, microstructural roughness as evidence of wear, 539
Skeletal muscle of rodent, myofibrillogenesis involving thick filament aggregates, 91
Smooth muscle cells in embryonic human aorta, heterogeneity, 31
Snail, terrestrial, *see Helix aspersa*
Spermatophore of barklouse (*Lepin patruelis*), sclerotised, 447
Spermatozoa
  flagellum
    glutamylated tubulin in, differential distribution in mouse of, 323
    structure in normal and dynein arm-deficient, 241
  osmolality effect in three marine teleosts, ultrastructural study of, 491
Spinal cord, type II cytokeratin expression of adult vertebrates, 555
*Spodoptera littoralis* (Lepidoptera: Noctuidae), antennal lobe projection patterns of olfactory receptor neurons involved in sex pheromone detection in, 221
Squamous epithelia, stratified, mucin-like glycoproteins of, 397
Stannius, corpuscles of, in arawana (*Osteoglossum bicirrhosum* – an ancient teleost), 425
Steroid(s), sex, ultrastructural changes in cystic duct epithelium of female Syrian hamster as result of treatment with, 149
Steroidogenesis, luteal cell, peroxisomes and sterol carrier protein-2 involved in cholesterol transport from lipid droplets to mitochondria during, 483
Steroidogenic activity of corpora lutea of marmoset monkey (*Callithrix jacchus*), assessment following in vitro microdialysis, 467

Sterol carrier protein-2 involved in cholesterol transport from lipid droplets to mitochondria during luteal cell steroidogenesis, 483
Stomach
*Rana temporaria* tadpoles, metamorphic changes in, 13
rodent embryos, structural study of appearance of innervation, 309
Submandibular gland fractions of *Trypanosoma cruzi* infected rats, cystatin S in secretory granules fractions isolated from, 167
*Suncus murinus*, renal lymphoid tissue, 421
Syrian hamster cystic duct epithelium, ultrastructural changes of female, as result of sex steroid treatment, 149

## T

Tadpoles of *Rana temporaria*, metamorphic changes in stomach, 13
Testis
building a, 129
mitotic cell characteristics in developing and adult, with observations on cell lineages, 105
*Oncorhychus mykiss* (rainbow trout), ultrastructural characterisation and changes throughout reproductive cycle of interstitial cells of, 383
*Tetrahymena pyriformis*, effect of long-term insulin exposure on insulin binding, 585
Thick filament aggregates in rodent skeletal muscle, myofibrillogenesis involving, 91
Thymus
pro-opiomelanocortin-derived peptides and cytokines in anuran amphibian (*Rana esculenta*), presence of immunoreactive, 263
reticulum, connective compartment in mice, 249
Toad, African clawed (*Xenopus laevis*), analysis of tissue organisation by microinjection of follistatin into early embryos, 331
Toothless (osteopetrotic) mutation in rat, osteoblasts from, unable to direct bone resorption by normal osteoclasts in response to 1,25-dihydroxyvitamin D, 569
Trout (*Oncorhychus mykiss*) interstitial cells of testis, ultrastructural characterisation and changes throughout reproductive cycle, 383
*Trypanosoma cruzi* infected rats, cystatin S in secretory granules fractions isolated from submandibular gland fractions of, 167
Trypanosomatids of *Phytomonas* spp., 3-D reconstruction of glycosomes in, 39
Tubulin in flagellum of mouse spermatozoa, glutamylated, differential distribution of, 323
Tunicates, two different forms of gap junctions (one with cytoskeletal attachments) within same organism, 545

## U

Ultrafiltration in annelids (oligochaeta), new aspects of possible sites of, 73

## V

Vasculature
endothelium of small vessels (microvasculature), differentiation during early angiogenesis and respiratory onset in chick chorioallantoic membrane, 159
of thymic reticulum of mice, 249
Vertebral ossicles of ophiuroid, skeletal calcite in, microstructural roughness as evidence of wear, 539
Vitellogenesis in Dermapteran *Labidura riparia* inhibited by 20-hydroxyecdysone, 575

## X

*Xenopus laevis* embryos, analysis of tissue organisation by microinjection of follistatin into early, 331
